Founder of BusBox Dravyn Private Limited, building a technology-driven parcel mobility platform that connects parcel senders with travellers and transport operators already travelling along compatible routes. Trained in artificial intelligence and machine learning, with experience in loss prevention data analytics at Amazon.

VENTURE

Founder

PRESENT

BusBox Dravyn Private Limited · Karnataka, India

- Leading product, technology, operations and business strategy for a parcel mobility platform, currently pre-launch.
- Building the platform: a Flutter app with sender, traveller and admin modes, a NestJS and TypeORM backend on Neon Postgres, a React admin console and Mapbox for routes.
- Designing route matching, pricing by parcel size and distance tapered for long routes, and the handover and delivery-confirmation flow.
- Planning the launch and the operating model, with anywhere-to-anywhere coverage across India as the goal.

EXPERIENCE

Analyst, Loss Prevention

PREVIOUSLY

Data Analytics · Amazon

- Worked in loss prevention data analytics, using data to surface patterns of loss and anomalies and to support prevention decisions.
- Gained a working understanding of how large operations run, where they leak value and how exceptions are handled.

SELECTED PROJECTS

YOLOv8 CCTV Anonymisation · Computer vision
A pipeline that detects people in CCTV footage with YOLOv8 and masks them automatically, so video can be reviewed or shared without exposing identities.
Python · YOLOv8 · OpenCV · Object detection · Video processing

NSEDAN · Medical imaging research
Deep-learning research on brain tumour segmentation, outlining tumour regions in brain MRI scans pixel by pixel to support faster, more consistent analysis.
Python · Deep learning · Semantic segmentation · Medical imaging

LexiAct · Voice-driven LLM assistant
Transcribes a spoken request, uses a large language model to work out the intent, then responds or takes the action.
Python · LLMs · Speech recognition · NLP · Voice interfaces

EDUCATION

Master of Computer Applications (MCA)

Specialisation in Artificial Intelligence and Machine Learning

Mangalore Institute of Technology & Engineering (MITE), Moodbidri

CAPABILITIES

Artificial intelligence
Machine learning, deep learning, computer vision, object detection, image segmentation, LLM applications, speech interfaces

Data and analytics
Data analysis, pattern and anomaly detection, loss prevention analytics, root-cause analysis

Engineering
Python, OpenCV, Flutter, NestJS, TypeORM, PostgreSQL, React, Vite, Mapbox

Venture building
Product strategy, marketplace and pricing design, operations planning, customer experience, business strategy

BUSBOX AT A GLANCE

CATEGORY
Parcel mobility, logistics technology

STAGE
Pre-launch, product in final build

COVERAGE
Anywhere to anywhere across India

TAGLINE
Closer than you think.
